Professionals Talk About Celebration

"Prior to choosing Celebration, I visited the polo fields at nearby Lakewood Ranch, where Celebration was installed. My first impression of the turf was how carpet-like it looked. I was equally impressed with how well it has held up under polo play. Two-months after installation of the rolled sod at our \$300,000 soccer complex, I was impressed with how quickly Celebration tacked down, and that it was already thick and green."

Bill Ward

Parks & Recreation Manager
City of North Port, FL

"Celebration has been a blessing to our school and athletic programs. It has been great for our limited budget because it requires little watering and low chemical maintenance. It has lived up to its 'billing'."

Mike Weaver

Booster Club, Calvary Christian Warriors
Clearwater, FL

"Celebration Bermudagrass has performed in all respects as described by Sod Solutions. This Turfgrass has had more rapid horizontal growth, and has withstood play better than other bermudagrasses. We are very happy so far with the end results."

Jody Peele

Director of Public Services Town of Mt. Pleasant
Mt. Pleasant, SC

"Before switching to Celebration, I practically had to replace my football field between the hash marks every year; now, I don't have to. Celebration saves me time and money and looks great. I am converting all my athletic fields to Celebration."

Cecil "Fig" Newton

Director of Public Services, Athletic Field Supervisor
Jacksonville Independent School District
Jacksonville, TX
